PROFESIONAL ICE MELTER

When you are faced with the tough job of selecting an effective ice melter, you need a product that will perform even under the most severe conditions. Professional Ice Melter is geared to outperform leading brands by melting more ice faster, it even works in extreme cold to a minus 12F.

Professional Ice Melter is a 4-way blend of tech-grade calcium, magnesium, potassium, and sodium chloride that is triple-screened to provide uniform spreading with maximum results. The entire blend is then coated with liquid magnesium chloride to enhance melting power and is then treated with an anticaking agent to allow easy pouring and extended shelf life.

When Professional Ice Melter hits the ice you will feel confident that you have made the best choice to protect high traffic areas against accidental falls and your workers from hazardous material exposure. Environmentally, Professional Ice Melter is safer for greenery and inside, is less binding to carpet fibers, making it the most suitable choice inside and out.

Professional Ice Melter is available in the following container sizes:

50 lb. Bag
50 lb. Box
80 lb. Bag
100 lb. Box

Order on-line through GSA *Advantage!* at www.gsaAdvantage.GOV or directly from the contractor at:

Federal Supply Schedule 49 I B Automotive Maintenance and Repair Shop Equipment

SHURE-STEP KICKS MILK CRATE'S BUTT!

Mechanics will use anything to stand on when working on large vehicles - milk crates, blocks of wood, even chairs. But now an inventor has developed an incredibly sturdy, slide resistant step that will reduce accidents associated with these inferior products in any automotive environment.

The Shure-Step is light. It only weighs 8 lbs. It is tough and can be run over by a 4 X 4 truck and it will pop back into shape. It is safe and has recycled tire pads to prevent sliding. It has high visibility because it comes in neon yellow. It uses 50% recycled plastic to keep costs low.

The Shure-Step comes in two models: the original "L" shaped step and a 2-ft. long straight unit. The "L"

shaped model makes jobs in the engine compartment a breeze while the straight unit is more versatile. It can be used working on a truck or stocking the top shelves in your store.

**Federal Supply Schedule 54 III
Above Ground Storage Equipment**

NATURAL GAS REFUELING SYSTEMS

FuelMaker Corporation is the world's leader in on-site natural gas refueling systems. At the core of FuelMaker's product line is the Vehicle Refueling Appliance (VRA), a self contained, integrated refueling device that compresses low-pressure natural gas, readily available at most locations for use in over-the road or in-plant vehicles (i.e. forklifts, floor sweepers, etc.). The American Gas Association and six other leading international design and certification organizations certify FuelMaker VRA's. To date, there are over 7,000 FuelMakers in service throughout the world.

FuelMaker's appliance rating translates into a number of benefits to the end user. The units have been specifically engineered with patented design and performance features that make them safe, reliable, simple to operate, and easy to maintain. The VRA classification also helps keep installation costs minimal compared to other CNG refueling equipment.

Any number of individual units can be combined to match the customer's specific refueling requirements. The FuelMaker Refueling System can accommodate time-fill and fast-fill applications, or a combination of both. FuelMaker's products provide federal fleets with an economic and convenient way to fuel their natural gas powered vehicles and help achieve compliance with the alternative fuel vehicle requirements stipulated by the Energy Policy Act of 1992 and the Clean Air Act Amendment.

Federal Supply Schedule 56 IV A Construction and Building Materials

POTABLE HOT WATER

Direct Fire Technical, Inc., has refined and patented a 1908 concept to generate potable hot water, at any temperature from 100 to 185 degrees Fahrenheit at 98 +% efficiency. The hot water is available on demand (30 seconds) and generated continuously until demand is satisfied. The design eliminates most water heater problems where large amounts of hot water are needed (15 to 300 gallons per minute).

Other features:

- One person can perform maintenance in about one hour even with hard water usage.
- Hard water friendly.
- No water pretreatment is required.
- Operates at very low pressure (5" of water column) and does not pose a pressure explosion hazard.
- Savings in fuel can pay for this equipment within two years when compared to a boiler. Additional fuel is saved because the machine does not need to use fuel for standby.
- Small "footprint". Smaller units can fit through a normal office door.
- The heater is environmentally friendly with less carbon dioxide generated (because less fuel is used) and very low exhaust emissions. No water is wasted in operation.

Order on-line through *GSA Advantage!* at www.gsaAdvantage.GOV or directly from the contractor at:

WATT STOPPER, INC. EXPANDS

The Watt Stopper, Inc., has announced its acquisition of Horton Controls, Inc. Horton Controls has over 15 years of experience applying lighting controls to all categories of commercial and industrial buildings. Horton Controls is headquartered in Birmingham, Alabama, with a manufacturing and product engineering facility in Warwick, Rhode Island, and a service support center in Schenectady, New York. The Watt Stopper, Inc., designs and manufactures a comprehensive range of lighting controls including lighting control panels, occupancy sensors, High Intensity Discharge (HID) and delighting controls, and innovative energy efficient power strips.

From 1994 to 1999, Horton Controls served as the national representative for Total Lighting Control and partnered in many of the product development initiatives. Horton Controls is dedicated to delivering lighting control solutions to the specifier, contractor and building owner. The combination of the Watt Stopper and Horton Controls will offer enhanced solutions incorporating occupancy sensing technology and networked intelligent controls.

Horton Controls joins the Legrand North America family of companies which include Pass & Seymour/LeGrand, a prominent manufacturer of wiring devices and related products for residential, commercial, institutional, industrial and consumer market; Ortronics, a manufacturer of data and communications connectivity products, and the Watt Stopper. Legrand is a world leader in the manufacturing of electrical wiring devices and accessories with sales of \$2.5 billion, operations in 54 countries, and 23,000 employees worldwide.

**Now Available Under Federal Supply Schedule 49 I B
Automotive Maintenance and Repair Shop Equipment**

THE FAST FLUSH COOLANT CHANGER IS FINALLY AVAILABLE

The Fast Flush Coolant Changer is finally available. The water pump of the engine primarily powers the unit. It also has an evacuation suction pump to remove coolant from the top of the radiator and overflow tank. There are no hoses to cut, the unit adds no pressure to the system, is very easy to use, and takes very little room on the shop floor instead of tying up a service bay for up to 45 minutes or more when changing coolant. The Fast Flush Coolant Changer will completely change out the entire cooling system (radiator, block, and heater core) in 7 to 15 minutes.

The unit is tall enough to let you do SUV's, Pick-Ups and most 4X4's. The old ways of cutting hoses, multi-step chemicals, hours of labor, tying up service bays, T-fittings, extra hose clamps, weak spots left in the cooling systems, etc., just can't compare financially, ecologically or logically with the Fast Flush Coolant Changer.

**EZ MOVES FURNITURE SLIDES: ONE SET ALLOWS YOU TO
MOVE ALL YOUR HEAVY FURNITURE AND MORE**

EZ Moves offers an unlimited range of uses for anyone who has to move anything over most floor surfaces. This easy-to-use product allows you to move most objects with minimal effort.

EZ Moves has a non-slip rubber top selected for strength, grip and compression release. Its 1/2" rubber foundation suspends flat bottom furniture above the carpet nap to reduce drag. Its non-shattering plastic base is chosen for long life and a high degree of resistance to friction. Rounded fronts and backs deflect rather than gouge anything that comes in contact with them.

Use at home or at work: Cleaning, moving, redecorating, installing carpet, remodeling, cleaning carpets, rearranging offices, and painting. You can move filing cabinets, desks, beds dressers, sofas, weight equipment, entertainment centers, appliances, pool tables and much more.

GSA SUPPORTS YOUR SCIENTIFIC EQUIPMENT AND SERVICES NEEDS

The General Services Administration's Federal Supply Service, through our Multiple Award Schedules Program, can supply you with a wide variety of scientific products and services to meet your laboratory needs.

We have four Federal Supply Schedules covering the gamut of laboratory services and equipment. These schedules are organized by Special Item Number (SIN) categories and list the many commercial brand name sources with whom we have contracts.

The four schedules are as follows:

66 II C – General Purpose Laboratory Equipment and Services

66 II J – Laboratory Testing and Analysis Services, Test and Measurement Equipment and Services

66 II N – Chemistry, Biochemistry and Clinical Instruments and Services

66 II Q – Geophysical, Environmental Analysis Equipment and Services

To receive copies of the printed schedule documents for the above, please call or write our Centralized Mailing List Service at the following:

Centralized Mailing List Service
P.O. Box 6477
Fort Worth, TX 76115
817-334-5215
cmls.gsa@gsa.gov
Fax: 817-334-5227

For information on available sources, go to the FSS webpage at www.fss.gsa.gov, click on "Information for Customers" and then click on "Schedules E-Library". There you will find lists of all of our current contractors, along with names and phone numbers and links to their corporate webpages.

To obtain items through the Schedules Program, you place your orders directly with the contractor who can best meet your needs; shipment and billing will come directly to you from the contractor.

Federal Supply Schedule 99 IV Signs and Display Systems

MULTI-BARRIER™ MB-2

The Multi-Barrier™ Model MB-2, manufactured by Off the Wall Products, LLC, is ideal for anti-terrorism applications because of its unmatched combination of durability and ease of handling and deployment. Unlike bulky alternatives requiring a large crew to set up, the Multi-Barrier™ MB-2 is the only traffic-control device that is easily deployed like a drum or barricade. Weighing only 50 pounds and easily deployed by only one person when empty, the 3-1/3' long, 4' high Multi-Barrier™ can be ballast with up to 1,000 pounds of water, providing significant, positive resistance to pedestrians or vehicles. In the Federal Highway Administration's NCHRP-350 crash-test procedures, a 100-foot length of interconnected Multi-Barrier™ MB-2 sections stopped a small car in 6- feet and a large pick-up truck in 12-feet. While providing this significant anti-terrorism resistance, the Multi-Barrier™ also deploys rapidly and easily, enabling personnel to effectively close entrances, roadways, and public facilities in just minutes.

The U.S. Navy, at its Norfolk Naval Facility, in Norfolk, VA, conducted flood testing and found the Multi-Barrier™ capable of withstanding 23-1/2 feet of still floodwater with little or no seepage. Spaces between the interconnected MB-2 barriers were sealed with standard, off-the-shelf polyurethane foam to prevent seepage. For a complete test report, or more information on this product, call Off the Wall Products, LLC.

FRESHEN UP ANYTIME, ANYWHERE PURETOUCH HAND SANITIZER AND TUSH WIPES

PureTouch Hand Sanitizer is formulated to kill germs on contact without the need for water. Simply rub a dime-size amount into your hands to kill germs in 15 seconds.

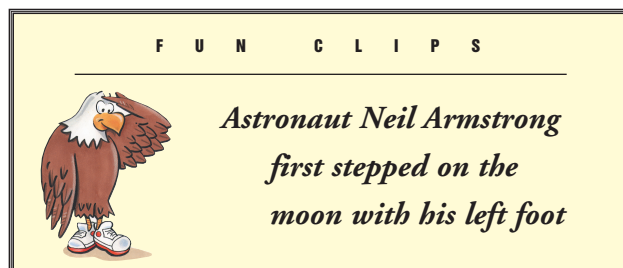

Our Hand Sanitizers contain aloe vera, glycerine, moisturizers, and natural extracts to keep your hands soft, smooth and refreshed. Our formula was designed to prevent your hands from drying out. PureTouch is also fragrance free.

Disease-causing germs are everywhere. PureTouch Hand Sanitizer is a great way to protect yourself from disease-causing germs, spread by hands. Our product is ideal for everyone who has contact with people.

Our PureTouch 4 oz. Travel Size and Single-Use-Packets were designed to carry with you in a pocket, purse or bag.

PureTouch Hand Sanitizer 8oz. Pump Bottles
1 case of 12 bottles
PureTouch Hand Sanitizer 4oz. Travel Size Bottles
1 case of 24 bottles
PureTouch Hand Sanitizer Single-Use-Packets
1 case of 500

PureTouch TUSH WIPES are a great complement and alternative to dry toilet tissue. Our soft towlettes offer gentle and thorough cleaning you can't get from dry toilet paper. Tush Wipes are conveniently packaged as an individual single-use-packet. Each Tush Wipe contains aloe vera, vitamin E, and natural moisturizers to leave you feeling fresh and clean.

Tush Wipes are a personal hygiene product ideal for employees who work in the field or at the office. They are biodegradable and safe for sewer and septic systems. The wipes are made from cellulose which comes from plants and trees. Use only one or two wipes per flush.

PureTouch TUSH WIPES Individual Flushable Moist Wipes - 1 case of 400

Intersign's Government Catalog, SignGuy®, provides solutions for your signage needs. Our extensive selection of signage products includes Room ID, Restroom, Traffic Control, Evacuation Plans and Directional signs in 20 standard colors to coordinate with any décor. Whether you need one sign or a complete sign system, our catalog highlights over 100 products. Many signage products feature changeable inserts for easy updating without the expense of replacing an entire sign. To create new inserts, simply print an insert with your laser printer and slide it into place. All interior sign surfaces are scratch and chemical resistant for durability and are backed by our "Life of the Building" guarantee.

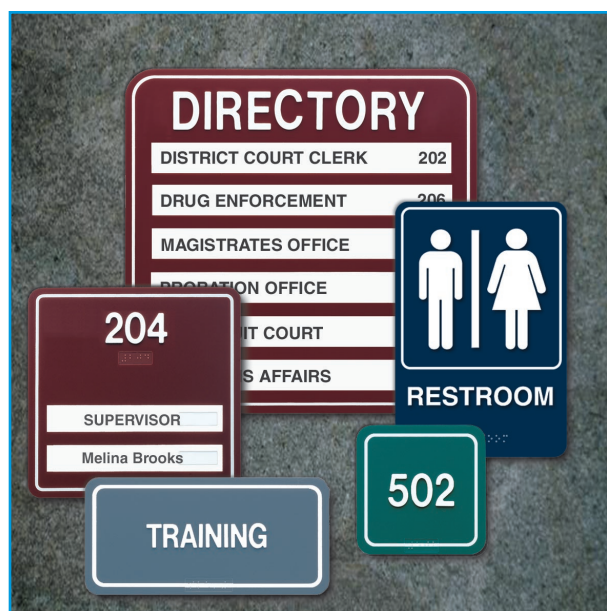

Our SignSpec™ service is also available to assess your signage requirements. Just supply us with blueprints of your facility and we will do the rest.

OIL/WATER SEPARATORS FROM QUAL TECH

Qual Tech's GSA price list & technical Information website contains a wide range of oil/water separators designed to meet the most stringent federal, state and local regulations covering the sewer disposal and recycling of oily wastewater.

The oil/water separators range from models (Ultrasep pictured) for low-flow oily condensates, such as generated by air compressor systems, to models (Ultracept pictured) that handle high flow oily discharge mixtures, such as generated by vehicle washes, parking lot run-off, manufacturing processes, etc.

WATER RECYCLING SYSTEMS AND OIL WATER SEPARATORS

Carwash recycling systems: Are you tired of broken promises, pit odor and expensive maintenance, and having to bypass your recycling unit? Then try Freytech carwash recycling systems. With over 7,500 units in operation worldwide (BP, Shell Texaco, Mobil, etc.), this unique system works. Open and closed loop system available. The maintenance free sterilization/degerming unit has a 5-year warranty. Give us a try and you will see that it consistently provides clean, odorless, recycled water (under 5 microns) with much less maintenance than any other system available on the market.

No ozone, no chemicals, no centrifuge, and no flotation.

Requires only two service calls per year.

Filters last between 25,000 to 40,000 washes before needing replacement.

Eliminates pit odor completely, guaranteed.

Provides clean....not gray, dirty recycled water.

Approximately 80%-90% savings in water and sewer discharge bills.

Saves 50% to 70% of soap expenditure with cloth/friction carwash systems.

Our mechanical oil water separators provide under 5-ppm separation capability even with extremely high concentrations of hydrocarbons. Made of oleophilous, durable corrugated sheets of polypropylene. Models range from 47 gpm to 1,500 gpm. Tanks and automatic shutoff are optional and can be supplied by Freytech, Inc. An additional tank serving as a sediment chamber in front of the separator is strongly recommended in order to reduce maintenance.

MAS ORDERS NOW INCLUDED IN 8(A) PROCUREMENT GOALS

As a result of a Memorandum of Understanding signed by GSA and SBA on June 7, 2000, Federal Supply Schedule customers now can count orders placed with 8(a) Multiple Award Schedule (MAS) contractors towards their 8(a) small business program procurement goals.

The 8(a) contracts, like other MAS contracts, are competitively awarded and are not the results of set-asides. Agencies may

place orders with these contractors exactly as they would with any MAS contractor. The Schedules E-Library and GSA *Advantage!* will identify the contractors as 8(a).

In addition to helping customers meet goals, this new initiative provides a great opportunity for 8(a) eligible contractors to capture a larger share of schedule sales.

Federal Supply Schedule 62 II Energy Efficient Products

STRINGRAY LIGHTING ENERGY SAVING HIGH BAY FIXTURES

The Stingray Dual Reflector HID System is changing the lighting industry standard for high bay fixtures. The Stingray fixtures have a patented adjustable inner reflector as well as an adjustable outer reflector. The unique design of the Stingray fixtures permit the installer to adjust the fixtures to drive light from the ceiling to the floor and provide a uniform distribution of light for each installation. With these dual reflector fixtures a conventional 400 watt fixture can be replaced by a Stingray Dual Reflector 250 watt fixture with no loss of existing light levels while saving 40% electrical energy. The Stingray 400 watt fixture can replace conventional 1,000 watt fixtures with minimal light loss while saving 60% electrical energy. If more light is needed in any application, existing fixtures can be replaced, one for one, with Stingray fixtures of the same wattage to increase foot candles by 30 -50%. This eliminates the need to buy additional fixtures and the added cost of installation and new electrical circuits back to the panel.

Send orders directly to the contractor at:

Stingray Lighting, Inc.

Federal Supply Schedule Group 74 IV Office Equipment Products and Services

EMBOSSING MACHINES

Have you been looking for an embosser to produce military I.D. Tags (Dog Tags), and medical I.D. cards? The Office and Scientific Equipment Center has them under Federal Supply Schedule Group 74, Part IV. Both automatic and manually operated (hand) embossers, capable of embossing both plastic cards and metal plates are available. There are a number of brands that provide an array of functions; from a single feed, on-line, keyboard operated, electronic embosser designed for ease of use as a low volume back-up embossing machine, to an automatic feed embossing system with electronic logic. There's an encoding option and in-fill/indent device, which makes it a versatile machine suited for health care facilities. A graphic option allows direct printing of logos, text and barcodes simultaneously with embossing. There is also a system capable of embossing, encoding and tipping plastic cards such as bank cards. The automatic embossers can be operated as stand-alone or from a PC or

mainframe using software designed to increase productivity, allowing maximum flexibility and versatility during day-to-day embossing operations. Most models have keylock and/or password security. For additional information, please visit our Schedules E-Library at www.fss.gsa.gov/schedules/, search for Special Item Number 51-156, Embossing Machines.

COST PER COPY AND FLAT RATE MONTHLY FEE PROGRAMS

Are you looking for a way to bring efficiency and economy to your agency's reprographic programs? Are you trying to figure out how to reduce your copier operating costs and administrative costs? We have a solution. Our Cost Per Copy and Flat Rate Monthly Fee Programs make it hassle free for you. With our Cost Per Copy program, you identify the minimum number of copies required each month. If you go over this minimum, you simply pay an additional fee for the excess copies. The contractor provides the equipment, full-service maintenance, and all consumables with the exception of paper and transparency films. Under our Flat Rate Monthly Fee Program, you pay a basic monthly fee regardless of the number of copies you make. As with our Cost Per Copy program, the contractor provides the equipment, full-service maintenance, and all consumables with the exception of paper and transparency films. These programs are typically designed for agencies having a need for 25 or more copiers; however, some of our Industry Partners may accommodate your agency if you require a smaller quantity.

So, relax and enjoy the ease of using one of these programs available to all Federal agencies. Both programs have the potential to save your agency an average of 30-40% when compared to existing rental, lease, purchase and maintenance programs.

For additional information on how the Cost Per Copy and Flat Rate Monthly Fee Programs can work for you, give us a call at:

ENERGY STAR — VALUE ADDED THROUGH ENERGY SAVINGS!

The Energy Star label may be found on clothes washers, refrigerators, dishwashers, and room air conditioners. Appliances that qualify for the label are generally at least 15% more efficient than Federal standards as determined by standard testing procedures.

Energy Star labeled appliances add value by saving you the energy and water cost of similar appliances. Energy efficient appliances cost less to own. Although energy efficient models sometimes cost more to purchase initially, any extra up-front cost can often be made up with savings on your utility bill. One helpful way to figure out if buying an Energy Star appliance makes sense for you is to think of two price tags:

The first price tag is the purchase price that you pay at the store when you buy the appliance.

The second price tag is the cost to operate the appliance over its lifetime. You pay to operate the appliance every month for as long as you own the appliance. You might be surprised to see how much it can cost to own an appliance that seems like a good deal up front.

The GSA *Advantage!* web site is currently undergoing construction to identify Energy Star residential appliances. In the meantime, GSA advises customers to identify Energy Star appliances by contacting the contracted supplier(s) listed in the

GSA *Advantage!* website, www.gsaadvantage.gov. Customers may also take effort to correlate the appliance models listed at the Energy Star web site, www.energystar.gov, with those models listed in the GSA *Advantage!* web site. The Energy Star website is not guaranteed accurate and shall only be used as a guide. The customer shall note that every effort is made by the EPA to ensure the accuracy of information identifying the model numbers of various appliances listed in the Energy Star website. However, model numbers change frequently and so this list may not always be complete. Additionally, manufacturers occasionally change the performance specifications of a given model without changing the model number. This means that it is possible for two products with the same model number and differing performance characteristics, to be available at the same time.

Federal Supply Schedule 75 II A Office Supplies

DESKTOP OFFICE PRODUCTS SCHEDULE NOW BIGGER, BROADER, BETTER

It's here! The newly expanded Multiple Award Schedule 75, Part 2, Section A, for office products and services brings new buying opportunities to Federal customers. To accomplish this, Special Item Numbers (SINs) for the 75 II A schedule have been greatly expanded, allowing more choices for our customers – more products, new services, greater savings.

Contractors now offer their full commercial catalog lines on schedule. This means greatly increased access to a much broader selection of office supply items – thousands of products – specific brand names, and the best discount terms available to the Federal customer.

The contracts with each vendor vary slightly. All include sales within CONUS, but some apply to Hawaii, Alaska and Europe. Special government catalogs and price lists will soon be issued by the contractors. Special vendor price promotions may or may not be included. Check with the contractor.

In summary, if it's in the vendor catalog it's under the contract, but all recycled products must comply with Executive Order 13101. Paper items contain a minimum of 30% Post Consumer Material. Also note that as authorized JWOD distributors — stocking, distributing and delivering JWOD (NIB/NISH) and UNICOR core items — their full catalog lines will exclude those items that are comparable to those from NIB/NISH ones.

The following contractors now offer their full commercial catalogs. Several more full product line vendors will be added in the near future.

Boise Cascade Office Products

Federal Supply Schedule 58 V A ADP/Telecommunications — Media Supplies

ERGONOMICS IS EVERYBODY'S BUSINESS

Under new standards set last November by the Occupational & Safety Health Administration (OSHA), Federal agencies will have to create programs to identify and fix ergonomics problems in the workplace.

According to OSHA, ergonomics-related problems account for one-third of all workplace injuries and illnesses. The proposed rules will establish guidelines for developing ergonomics programs in the workplace. The need is obvious. For people working repetitive tasks such as computers, the hazards can be pervasive and debilitating but are not incurable and are preventable. Ergonomics is the science of designing work tools that protect the health of workers. OSHA argues that when ergonomics is ignored, workers can develop injuries and disorders such as carpal tunnel syndrome, tendinitis, herniated discs and lower back pain, which result from repetitive motion, or performing work in awkward positions.

When ergonomic principles are used in the design of new tools and devices, the causes of these workplace injuries are greatly eliminated, reducing injuries, increasing worker's satisfaction, reducing absenteeism, and increasing productivity. For example, The advent of the computer brought many orthopedic problems to the workplace, along with employee eyestrain. To counteract this, wrist rests can support wrists and at the same time, maintain them in completely horizontal positions, preventing carpal tunnel syndrome and reducing pressure on the median nerve.

GSA offers many solutions to ergonomic-related problems through Federal Supply Schedule 58, Part V Section A. The negotiated prices are as low as you will find and the variety available gives you the options to make the best possible buying decision. You may order by phone, fax, or internet at www.gsaAdvantage.GOV.

The following is a partial list of Schedule 58 VA contractors and the products they offer. For a complete list of contractors on schedule visit our Schedules E-Library at www.fss.gsa.gov/schedules.

Federal Supply Schedule 75 II A Office Supplies

DON'T GET STUCK IN A BIND... STOCK UP ON BINDERS!

Columbia Loose-Leaf Corporation offers – through Federal Supply Schedule 75 Part 2 Section A — an assortment of the binders you need for keeping notes and records organized and accessible. A wide variety and assortment of binders includes round-ring and D-ring styles in sizes from 1/2" to 3". Styles also include binders with stiff rings and pull rings, as well as easel binders, album binders, and certificate binders (great to have for that last-minute award ceremony). Columbia also makes the perennial workhorse, the pocket size flexible Airforce technical manual binder, measuring 8" by 4" with a 1" capacity, making it spacious but conveniently fitting into a jacket pocket.

Established in 1945, Columbia is a woman owned and operated small business that manufactures quality binders at competitive prices with on time deliveries.

Save time by ordering now. Get the larger sized binders for those overstuffed binders you've been meaning to replace. These are just a few of what their numerous styles include:

White 2" capacity general use loose-leaf binder with vinyl cover and clear front and rear panels for inserts. Accommodates 11" x 8-1/2" sheets. opens from right-hand side. Contains 80% PCM Paperboard; 25% Recovered Material Plastic; Formerly NSN 7510-01-203-8814

Black 2" capacity loose-leaf binder has a stiff plastic cover. Accommodates 8-1/2" x 11" sheets. General use loose-leaf binder opens from right-hand side. Contains 80% Postconsumer Material Paperboard; 25% Recovered Material Plastic. Formerly NSN 7510-01-278-4130.

Flexible Blue Pocket-Size Technical Manual blue binder for 4 x 8" sheets. Keep important information nearby. Pocket-sized

binder is designed for USAF technical manuals. Flexible plastic cover has a white, rectangular block, durable enough to withstand marking with a ballpoint pen and erasing black lead pencil marking. Side-opening binder has a six-ring closure and a 1" capacity. Formerly NSN 7510-00-082-2667

8" x 5" style with 1-1/2" Capacity also available. Formerly 7510-00-241-4958.

Blue Certificate Binder boldly displays one 8" x 10-1/2" and one 11" x 14" certificate. Comes with protective acetate sheets. In dark blue vinyl with Air Force logo on front cover. Formerly NSN 7510-00-134-8179

Formerly stock items, these binders are now available directly from the manufacturer on GSA Schedule. You can order on-line through GSA *Advantage!* at www.gsaAdvantage.GOV or directly from the contractor:

GOVERNMENT EMPLOYEES HAVE THE POWER TO HELP AMERICANS WITH DISABILITIES

Get high quality office and janitorial products, convenient ordering, and fast delivery by purchasing **SKILCRAFT®** quality supplies through GSA authorized distributors. A new Federal Supply Schedule – the JWOD SCHEDULE — now enables federal employees to purchase supplies manufactured by Americans who are blind or severely disabled. Distributors include organizations you know and trust, including GSA and private sector vendors such as Boise Cascade, Corporate Express, Office Depot, Staples, Sherwin Williams, Grainger, and Maintenance Warehouse.

SKILCRAFT® products are available through their custom Federal catalog programs, but are not sold through local retail outlets.

SKILCRAFT® products are provided under the Javits-Wagner-O'Day (JWOD) Program, legislation that establishes a Federal mandate for the purchase of products and services provided by organizations employing people who are blind or severely disabled. Under the JWOD Program, the Federal Government's vast purchasing power is harnessed positively by designating **SKILCRAFT®** products and services as the preferred source of supply for all Federal entities.

A model Federal program...then and now!

Over 60 years since its creation, the JWOD Program has provided jobs for tens of thousands of legally blind people and peo-

ple with other severe disabilities. The program benefits:

Society — because people who are blind have traditionally been unable to eradicate a 75% unemployment rate. Still fighting an uphill battle relative to the low national unemployment rate among non-disabled persons, people who are blind or disabled are now earning income, paying taxes and putting money back into the economy, reducing their dependence on tax-funded Federal and state assistance programs.

Government — with thousands of quality products and services delivered on time at fair market prices, Federal employees receive products and services that allow them to comply with the JWOD Program. The government also benefits through increased tax payments, fewer transfer payments and reduced contracting costs.

People Who Are Blind — who enjoy diversified career opportunities, increased independence and improved self-esteem. Americans who are blind or severely disabled work in non-profit agencies or community rehabilitation centers and earn competitive wages and fringe benefits.

Get high quality products, convenient ordering and fast delivery every time you order supplies. Look for the **SKILCRAFT®** logo or JWOD product designations in Federal office supply catalogs. You may also purchase online at www.gsaAdvantage.gov or at www.jwod.com.

Federal Supply Schedule 42 I B Firefighting and Rescue Equipment

AIR PURIFYING PERSONAL RESPIRATORY PROTECTIVE DEVICE

The EVAC -U8 is a portable, high-performance air purifying personal respiratory protective device. It provides respiratory, head and eye protection in hazardous fire and toxic chemical atmospheres.

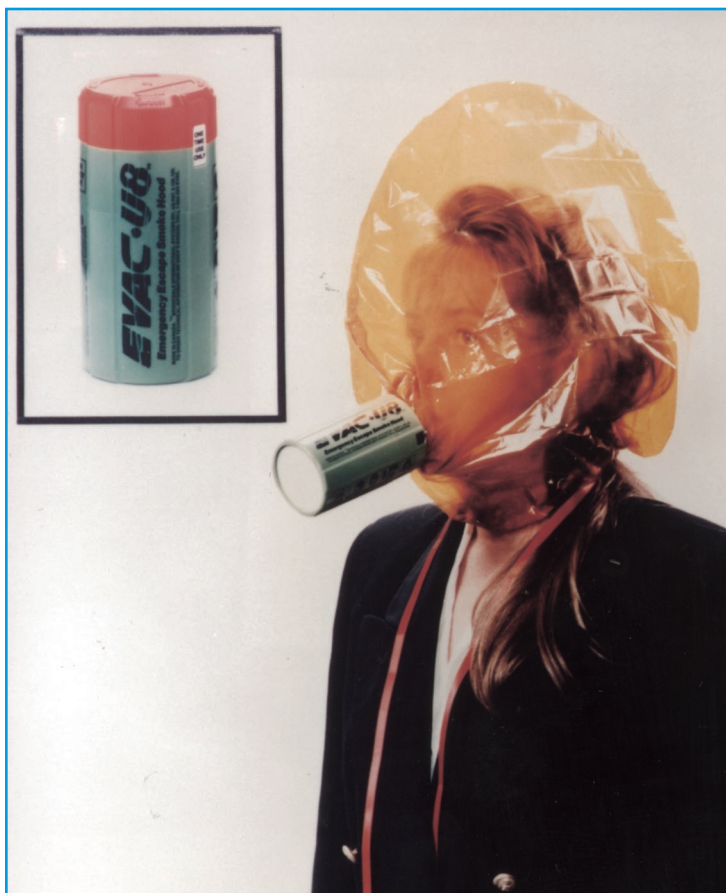

Developed primarily for protection against fire gases such as Acrolein, Hydrogen Cyanide and most importantly Carbon Monoxide, extensive testing revealed EVAC-U8's effectiveness against a number of chemical agents. These include Sarin, Phosgene, Tabun and VX Nerve Gas, as well as tear gas and pepper spray.

EVAC-U8's unique combination of characteristics makes it the best possible choice for protection from potentially lethal smoke and other toxic gases while traveling, in offices or other buildings, or anywhere a toxic emergency could occur. EVAC-U8 also provides a significant price advantage over any other design capable of similar levels of protection.

Federal Supply Schedule 42 I B Firefighting and Rescue Equipment

FIREFIGHTERS CLAMP BY TIMBERLINE TOOL & CASTING

When seconds count, you can count on Timberline.

The remarkable Timberline Firefighters Clamp is the perfect partner for safe and rapid shut-off when changing nozzles, replacing damaged hose, or performing consecutive hoselays. The unique single-action clamp shuts off water in charged lines as quickly as 1 + seconds. To install simply roll the hose into the open jaws and depress the handle to lock securely into place. The clamp self-locks and will remain locked until manually released into the top handle. Available in two sizes for cotton and synthetic hose up to 3" diameter. Optional accessories include a clamp holster and fuse pouch for your standard web gear.

Order on-line through GSA *Advantage!* At www.gsaAdvantage.GOV, or directly from the contractor at:

Federal Supply Schedule 42 I B Firefighting and Rescue Equipment

QUALITY FIRE EXTINGUISHERS

Flag Fire, Inc., a Toledo, Ohio, based company, is a premiere manufacturer of quality fire extinguishers and other related accessories. Whether the need is for dry chemical ABC, PDC, PKD or a clean agent (NAF-S) special hazard spot protectors, Flag manufactures a fire extinguisher for the application you need. Flag offers products that can be customized to adapt to special machinery, vehicles, processing equipment, etc. Unlike other fire extinguisher's available today, Flag's extinguisher design is unique (sporting a "CUSTOM DESIGN BOTTOM" to prevent foot injury if it should become dislodged from its hanger hook or accidentally dropped). The "EXTERNAL VALVE SPRING DESIGN" is no accident. Extensive industry research influenced the extinguisher's design to make them the easiest and fastest to service in the industry. Since the early 60's Flag products have been the choice of discriminating buyers.

Complete information on Flag Fire and their products are available on their web page at www.flagfire.com. When the need arises for Fire Extinguisher Cabinets, Hose Racks, Heavy Duty Brackets, Wheeled Units, Pump Tanks, Cartridge Operated Extinguishers as well as special finishes such as CHROME, BRASS or any CUSTOM color of your choice, Flag Fire stands ready to satisfy your requirement.

Federal Supply Schedule 63 I Total Security Solutions

SECURITY SYSTEMS

New challenges face today's facilities. In the past, security systems were designed to protect employees from theft. The threat has now changed to domestic and international terrorism, as well as work place violence. Federal Supply Schedule 63, Part I, provides security solutions for the Federal and Military Community. The following solutions are available:

Perimeter Security Systems
Access Control Systems
Intrusion Detection Systems
Fire Alarm Systems (Smoke and Fire Detection)
Facility Management Systems

You can also obtain security consulting services, installation, maintenance, and training all on one order. The contractors provide the total solution to your security requirements.

In addition to security systems solutions, you can also obtain guard services under the same schedule. These services are purchased at hourly rates, using your statement of work. We now have 9 contractors on the program to meet your needs and more are being added on a regular basis!

To obtain a copy of our current Security Solutions catalog online, visit the General Products Center website at www.gsa.gov/regions/7fss/7fx/.

To view the current list of contractors and obtain ordering information, visit Schedules E-Library at www.fss.gsa.gov/schedules/. Schedules E-Library provides updated contract award information on demand.

These Products and Services are available on GSA *Advantage!*, www.gsaAdvantage.GOV

Federal Supply Schedule 63 I Alarm and Signal System

GUARD SERVICES

Heritage Services, Inc, has been awarded a contract from the General Services Administration to provide Guard Services under the Federal Supply Schedules Program.

The various types of services offered by Heritage Services include: CCTV monitoring, personal protection, roving foot patrols, magnetometers, surveillance, console operators and mobile vehicle patrols. Additionally, Heritage Services has the ability to provide a customized security program designed to meet specific job site requirements.

Heritage Services provides innovative and cost effective solutions to the multifaceted needs of their customers in the areas of Security and Access Control Services. Due to their record of excellent performance with the Federal Government and large commercial clients, Heritage Services has been able to display a consistent pattern of growth and profitability since its inception in 1991.

Federal Supply Schedule 63 I Alarm and Signal System

SECURITY PADLOCKS

ABLOY - PL Series Maximum Security padlocks are being used by more and more DOD and U.S. Government facilities. The factory-restricted keyway provides excellent key security with millions of useable keycuts on a keyway that is available only from the ABLOY location in Irving, Texas.

The General Field Service Padlocks (PL 655 and 656) are the only padlocks that meet FFP 2827 specs. They deliver security and tremendous resistance to environments of all types. The ability to deliver keyed-alike groups of any size allows operations to greatly reduce the number of keys they must use and track (i.e., a military vehicle with 6 padlocks applications now needs only one key). Plus, ABLOY Flexible Shackle Keyring Padlocks use unlocking and locking to load and unload keys, eliminating the "is this an old weld or new weld" guessing game for key control. In addition, every ABLOY - PL Series Padlock is covered by a Lifetime Functional Warranty.

Federal Supply Schedule 63 I Alarm and Signal System

SECURITY SYSTEMS

ADEMCO Group's Government Systems Division is committed to providing Federal agencies with the highest quality products and systems that comply with government security requirements. Our unique GSA schedule (GS-07F-0063H) offers one of the country's best value solutions delivering everything from initial site survey and needs assessment, all the way to final training on a newly installed system and everything in between. As a part of ADEMCO Group's ongoing effort to be the government's single security source, we are proud to offer our Northern Computers' access control systems on schedule.

Access control is an effective and affordable solution to many problems. The weakness of a lock and key or mechanical security system is the key. This poses a problem with rapid employee turnover rates, and stolen or misplaced keys. With access control, each person receives a card or keycode, restricting access to authorized areas at specified times. A small, programmable control panel allows or denies access. If a card is lost or stolen, or if a keycode is no longer secure, the control panel can be reprogrammed quickly and easily.

Another benefit of access control is its reporting capability. The system provides reports of each time-stamped card/keycode activity, including whether access was granted or denied, and why. Permanent record of all entries to an area can be maintained. If a security breach occurs, the reporting feature assists in the investigation of the security issue. Our access control solution helps to continually identify your security issues while saving your facility significant dollars in future problems, legal issues, productivity and turnover.

Federal Supply Schedule 84 VI A Law Enforcement and Security Equipment

TACTICAL HEADSETS FOR SPECIAL FORCES AND SWAT

Television Equipment Associate's headsets for Tactical and Surveillance applications are adaptable to all popular and professional radios. TEA will provide Military, Government Agencies, and Police Departments with sample products adapted to your radios for a 30 day evaluation without obligation. We have a wide range of different portable radio headsets to complement the requirements of different missions as illustrated on our web site www.swatheadsets.com.

TEA provides headset & intercom system:

The LASH throat mic headset, transmits in whisper-like normal speech and is not affected by high noise.

Need to go swimming with your radio? See the occasional Swimmers Kit. Both radio container and headset are submersible to 66 feet of water. One common feature of all headsets is rock-solid reliability; the components were designed for extremely harsh usage.

Remember, call for a no-obligation, 30-day evaluation.

Federal Supply Schedule 71 II H Packaged Furniture

HEALTHCARE PACKAGED ROOMS

Healthcare Packaged Rooms are now available under Multiple Award Schedule 71 II H. These complete turnkey packages offer every product and service necessary to create and deliver the ideal healthcare environment from start to finish. Included are design, layout, color coordination, delivery and installation of the furniture and furnishings. Every detail to achieve a completely furnished and decorated healthcare room is handled for you by one supplier, with one purchase order. The burden of administering multiple orders and contacting various suppliers is eliminated. All major healthcare suppliers, including Marvin J. Perry Associates, Trade Products Corporation, Thompson Healthcare Design and Capitol Furniture Distributing Company, are a part of the program. The Packaged Healthcare Rooms, which include the exam room, the waiting room, the long-term care bedroom and the office, allow you to focus on more important things...your patients.

For a listing of contractors on GSA Schedule that provide packaged healthcare solutions, please visit our Schedules E-Library at www.fss.gsa/schedules/.
